

SESSIONS:

User Creation:

- Ability to "schedule Sessions" with date/time and alert users via email that a Session has been made.
- Ability to delete that session.
- Alert users who have signed up that the Session has been deleted.

User Signup:

- Ability to search/find Sessions and sign up for them.
- Get an email when signed up, get an email when session is about to begin, get an email if creator cancels the Session.

Creating a Session:

- Pick an activity (Play, Read, Watch, Learn)
- Write what you want to do (youtube video, specific game or movie, etc)
- Select Date and Time
- Have a way to contact and connect with one another (email)

User Profiles:

- Show on profile a tracker for how many sessions someones been to and created.
- Something like what Steam does, awards for X amount of sessions or something (like a star on your account)
- Allow users to add other users to friends list
- Create a timeline like Facebook to share your Sessions so others can sign up easily, also text status updates.
- Create a chat system so users can contact each other live.

LOGIN:

- Allow users to create an account and use things like Google or Facebook to sign up faster.
- Send a verification email that you have joined.

LONG TERM/FUTURE PLANS:

- Implement Steam, Netflix, YouTube, Twitch, Audible and other businesses so you can search their libraries and sync up directly through them.
- Video Options so users can interact "face to face" during Sessions. (like Twitch, video in corner of screen)
